Sprint 2 Retrospective Report

Cass Dahle
Aayush Shrestha
3/17/25

Summary of Team Feedback and Agreed-Upon Action Items for Future Sprints

Sprint Highlights: During Sprint 2, we focused on building the pages for Lab Management and Equipment Management. Major achievements were:

- Development of lab cards that show all labs that a user is enrolled in.

- Development of equipment available in the Lab.

- Admin can add equipment to specific lab.

- Admin can create new labs, modify existing labs, delete existing labs.

- Admin can add and remove users from and to a lab.

Key Learnings and Challenges:

- Aayush learned typescript, and frontend work.

- Design decision between relationship of equipment and lab.

-

Unfinished Work and Areas for Improvement:

- Functionality to remove / modify equipment.

- Display number of equipment's available in each lab.

- When adding users to lab, be able to specify their role in the lab.

- Be able to book equipment.

-

Action Items for Sprint 3:

- Same as **Unfinished Work and Areas for Improvement**

-

With the foundational work from Sprint 2 completed, Sprint 3 will focus on finalizing the features from Sprint 2. A new system for equipment booking and management will be implemented.
